

WASPAA 2023

Mohonk Mountain House, New Paltz, NY
Oct. 22-25, 2023

The IEEE Workshop on Applications of Signal Processing to Audio and Acoustics (WASPAA) is a highly-regarded bi-annual event hosted by the Audio and Acoustic Signal Processing Committee of the IEEE Signal Processing Society since 1986. It takes place at the Mohonk Mountain House in the Shawangunk Mountain region of New York, which is renowned for its scenic beauty, particularly during autumn. The intimate setting of the workshop encourages fruitful conversations between leading researchers in audio and acoustic signal processing from both academia and industry. Although smaller in scale compared to flagship conferences such as ICASSP, WASPAA remains a must-attend event for anyone in this research community.

PATRON PROSPECTUS

WASPAA 2023 organizers are optimizing corporate sponsorships to benefit conference attendees and patrons. The enhanced sponsorship opportunities increase sponsor visibility during the event and support outreach and community service goals. The three-tiered sponsorship structure includes:

	GOLD \$5,000 <small>(LIMITED TO THREE COMPANIES)</small>	SILVER \$2,500	BRONZE \$1,000
Spotlight minutes during the dinner: Each gold patron gets to sponsor one of the three all-hands dinners. Company representatives get spotlight minutes during the event.			
Exclusive access to the student luncheon table We'll dedicate a table for sponsors to meet with a select group of student participants who agree to share their contact information. This provides an informal but focused opportunity for companies seeking talented candidates.			
Right to name the visible and important workshop events and programs Gold patrons may name and sponsor one highly visible workshop component of their choice from the following: # One of the three keynote speeches # The best paper award # The student best paper awards			
Student and Young Professional Travel Grant Sponsorships WASPAA 2023's new Diversity & Inclusion Committee will provide more travel grants to students, young professionals, and underrepresented participants than ever before. Gold and silver sponsorships will contribute to 4 and 2 grants, respectively, through the IEEE Signal Processing Society and IEEE Foundation.			
Advanced registration We reserve up to two hotel rooms per gold sponsor and one for other sponsors, so the company representatives will have the opportunity of registering for the conferences and booking their accommodation at their expense before the general public, guaranteeing their opportunity to attend the conference.			
Company Logos The workshop website will present the company logos with their corresponding tier information to maximize visibility. This will also include a clear indication of the individual components that the patron chooses to support.
